

Animal Decomposition Cycle

4K HD | Vertical 9:16 (Shorts/Reels) | 60 FPS High Frame Rate | 8 sec per clip

How to use:

Common Settings (use in every part)

Resolution: 4K HD (Ultra HD)

Aspect Ratio: 9:16 (vertical short)

Frame Rate: 60 FPS (high frame rate, ultra smooth)

Duration: 8 seconds per clip

Style: Photorealistic / National Geographic documentary

Choose Your Animal

In the prompts below, replace [ANIMAL] with one of: Deer, Fox, Cow, Goat, Bird, Rat, Rabbit, Lion.

QUICK ONE-LINE PROMPTS (copy-paste ready)

Short single-line prompts - fastest to use. Replace [ANIMAL].

Part 1 - Fresh (just died)

4K HD, 9:16, 60fps, 8s: a freshly dead [ANIMAL] lying on forest floor, body intact, soft morning light, flies starting to hover, photorealistic National Geographic style, slow push-in.

Part 2 - Insects eating

4K HD, 9:16, 60fps, 8s: dead [ANIMAL] carcass swarming with maggots and flies feeding, macro detail, decaying skin, eerie forest ambience, photorealistic, slow pan.

Part 3 - Bones appearing

4K HD, 9:16, 60fps, 8s: decomposed [ANIMAL] with white bones and rib cage emerging from remaining tissue, few insects left, dry leaves, cinematic drift, photorealistic.

Part 4 - Skeleton only

4K HD, 9:16, 60fps, 8s: clean white skeleton of a [ANIMAL] on forest floor, grass growing around bones, soft sunlight, peaceful circle-of-life ending, photorealistic, slow pull-back.

PART 1 - Animal at time of death (Fresh)

IMAGE PROMPT:

Ultra-realistic 4K HD nature documentary photograph, vertical 9:16 aspect ratio. A [ANIMAL] lying lifeless on the forest floor, body intact and freshly dead, fur/feathers still natural, eyes closed, peaceful but motionless. Soft morning light filtering through trees, dewy grass, dirt and dry leaves around. Cinematic shallow depth of field, natural earthy colors, highly detailed texture, National Geographic style, photorealistic, sharp focus. No blood, respectful nature scene.

VIDEO PROMPT:

4K HD cinematic nature documentary clip, vertical 9:16, 60 FPS, 8 seconds. A freshly dead [ANIMAL] lying still on the forest ground. Gentle camera slow push-in, soft wind moving the grass and a few leaves, light flies beginning to hover around the body, morning sunbeams shifting slowly. Calm, quiet, realistic atmosphere. Ultra-smooth high frame rate motion, natural ambient lighting, photorealistic textures, National Geographic style.

PART 2 - Insects eating (Decomposition starts)

IMAGE PROMPT:

Ultra-realistic 4K HD macro nature photograph, vertical 9:16 aspect ratio. The body of a dead [ANIMAL] now covered with insects - maggots, flies and beetles crawling over the decaying skin. Fur/feathers matted, body slightly sunken, swarms of flies around. Damp forest floor, muted greenish-brown decay tones, extreme detail on insects, cinematic macro focus, photorealistic, documentary realism.

VIDEO PROMPT:

4K HD macro nature documentary clip, vertical 9:16, 60 FPS, 8 seconds. Close-up of a decaying [ANIMAL] carcass swarming with maggots and flies actively crawling and feeding. Insects moving realistically, flies buzzing and landing, slow camera pan across the body. Time-lapse feel of decomposition, dim natural light, eerie quiet forest ambience. Ultra-smooth high frame rate motion, hyper-detailed insect movement, National Geographic style.

PART 3 - Bones appearing

IMAGE PROMPT:

Ultra-realistic 4K HD nature photograph, vertical 9:16 aspect ratio. The decomposed [ANIMAL] now mostly broken down - patches of bone and rib cage becoming visible through the remaining decayed tissue and fur. Fewer insects, dried skin, scattered remains on the forest floor with dead leaves and soil. Pale bone contrasting with dark decay, cinematic lighting, gritty realistic texture, documentary style, photorealistic, highly detailed.

VIDEO PROMPT:

4K HD cinematic nature documentary clip, vertical 9:16, 60 FPS, 8 seconds. A [ANIMAL] carcass in advanced decay, white bones and rib cage now emerging from the remaining tissue. A few last insects crawl away, gentle wind moves dry leaves over the remains, slow cinematic camera drift revealing the exposed skeleton. Cool fading daylight, somber natural mood. Ultra-smooth high frame rate motion, photorealistic decay detail.

PART 4 - Skeleton only (Bones remain)

IMAGE PROMPT:

Ultra-realistic 4K HD nature photograph, vertical 9:16 aspect ratio.
Only the clean white skeleton of a [ANIMAL] remaining on the forest floor - full bones and skull arranged naturally, no flesh left. Surrounded by grass, fallen leaves and soil, small plants starting to grow around the bones.
Soft natural daylight, calm peaceful ending mood, bleached bone texture in fine detail, cinematic, photorealistic, documentary style.

VIDEO PROMPT:

4K HD cinematic nature documentary clip, vertical 9:16, 60 FPS, 8 seconds.
The clean white skeleton of a [ANIMAL] resting on the forest ground, fully decomposed.
Slow cinematic camera pull-back revealing the bones surrounded by growing grass and leaves, soft sunlight breaking through trees, gentle breeze. Peaceful circle-of-life ending tone.
Ultra-smooth high frame rate motion, photorealistic bone detail, warm natural lighting.
